Deadline to register: Please register by noon on March 14.

DETAILS:

On Friday, March 15, One Ocean, an inter-industry liaison organization for the Newfoundland and Labrador fishing and petroleum industries, will be hosting a seminar on marine seismic surveys. The purpose of the seminar is to convene a forum for members of the Newfoundland and Labrador fishing industry, along with members of the petroleum industry, regulators, researchers, seismic company representatives, and other stakeholders, to share information on marine seismic surveys.

Seminar presentations will include:

- "101" of marine seismic surveying
- Types of marine seismic surveys and new technologies
- Regulatory framework for marine seismic surveys
- Fishing industry presentations
- The latest in marine seismic research

Seminar speakers will include representatives from Atlantic Groundfish Council, Canadian -Newfoundland and Labrador Offshore Petroleum Board (C-NLOPB), Department of Fisheries and Oceans Canada (DFO), ExxonMobil, Fish Food and Allied Workers Union-Unifor (FFAW-Unifor), and PGS.

To register email Ashley Woodford, One Ocean, Ashley.Woodford@mi.mun.ca, or call (709) 778-0511, **and indicate if you will be attending in person or virtually by Teams.** Please register by noon on March 14.

About: One Ocean, an inter-industry liaison organization for the Newfoundland and Labrador fishing and petroleum industries, provides a neutral and practical forum to enhance sustainable coexistence and facilitate communication, understanding, and cooperation between the two marine industries. The One Ocean model is unique to the world, providing a valuable forum for two important industries operating in the marine environment to come together, collaboratively and proactively.
