Project Information

This project is led by the Marine Institute of Memorial University, with the goal of determining the abundance of green crab near reef ball clusters at a comparative site (see map). Harvesters will be required to set 10 Fukui traps (provided) near reef ball clusters and 10 Fukui traps at the comparative site. Two MI staff will be aboard to set and haul traps and to record catch. Rate is **\$500/day** for 5 days with the harvester providing bait and fuel.
